

## Forces of Nature

• [WATER + LIFE MUSEUMS, HEMET, CA]

Located near the entrance of the man-made Diamond Valley Lake, these sister museums, designed by Lehrer + Gangi Design + Build to resemble giant water turbines, tell the story of Southern California's infrastructure. The Center for Water Education includes a simulated dam; the Western Center for Archaeology and Paleontology houses Pleistocene fossils ([CenterForWater.org](http://CenterForWater.org), [WesternCenterMuseum.org](http://WesternCenterMuseum.org)). —KL
